EXPERIENCE

Instiq Professional Services, Lagos — Frontend Developer

January 2019 - PRESENT

- I have experience with HTML, SCSS, JavaScript, React.js and Next.js
- I can implement solutions that are user responsive and efficient.
- I have knowledge of the entire web development process.
- I am capable of implementing a resilient web architecture.
- I have experience with testing and debugging.
- I have an eye for layout aesthetics.
- I am analytical and also have a keen eye for details.
- I have great problem-solving skills and I work well in a team.
- I am curious about new technologies and I am driven to find ways to implement them in my work.
- I have a big appetite to learn and improve my front-end skills.

Instiq Professional Services, Lagos — UX-Designer

DECEMBER 2018 - PRESENT

- Worked with developers, product managers in designing payment and credit solutions using AdobeXD and Figma.
- Created sketches, wireframes, and mockups of user interface screens according to the requirements/user stories that adhere to the Look & Feel Standards as well as any applicable regulatory requirements. Creates high-fidelity functioning prototypes using Adobe XD and Figma
- Reviews wireframes with Product Owners/managers for business requirements and with Technical Lead for technical feasibility before presenting to the business.
- Identify new product improvement opportunities and propose research to validate these ideas.
- I effectively communicated design ideas to a broad range of stakeholders (management, engineers, product) using user flows, process flows, site maps, and wireframes.
- I worked with product managers to analyze how a new product satisfies market needs and consumer preferences.
- Modification and revision of existing designs to meet changing customer preferences.
- Coordinate with other design team members to follow consistent design guidelines, standards, and best practices.
- I worked closely with product managers to suggest improvements for products and processes.

PROJECTS

Payment Gateway (Red)

This is a payment gateway solution that helps merchants to process payment with ease and speed for service offered on their platform. I worked as the lead for the frontend team that developed the solution and implemented all the necessary API using Next js, a react framework.

Workflow Application

Thus is an application that automates all processes of documentation, approval, tracking, etc in an organization. I worked as a member in the frontend team that developed the solution and implemented all the necessary API using Next js, a react framework.

TME CORE-MFB — *Transaction Made Easy Core Banking Application for Microfinance Banks*

This is a core banking application for microfinance banks. With the app, banks can process day to day banking activities that includes, Loan booking, investment booking, teller operations, etc. I lead the UX team that designed the application using Adobe XD and I was a key member of the front end team that developed and implemented all API using React Js.

TME CORE- Commercial Bank- *Transaction Made Easy Core Banking Application for Commercial Banks*

This is a core banking application that manages all teller operations in a commercial bank. The bank uses this application to service their customers in Nigeria and in all their other branches across Africa. I worked as part of the front end team using HTML, CSS & JAVASCRIPT
